# Environment and Rural Development Program (EnRD) and Disaster Risk Management Component 5

## Who we are . . .

The Disaster Risk Management component is a partner of LGUs and communities in proactively reducing disaster risks.

# What we do . . .

Local Flood Early Warning Systems supported by the affected communities help save lives and reduce **losses and damages** from recurring natural hazards.

## Local Flood Early Warning Systems

***“ Ahead of the enactment of the National Disaster Risk Reduction and Management Act of 2010 and other relevant policies and guidelines, LFEWS has advanced its local contributions to disaster preparedness and response and early warning.”***

# What we do ...

**Hazard Risk Mapping**, that combines the power of community participation with technological advantage, is now recognized as **the** essential tool in decision making for development.

In close partnership with . . .

# What we've achieved so far . . .

- ✓ 47 LGUs capacitated to integrate DRM in local development planning
- ✓ 12 LFEWS established serving 29 LGUs in 10 provinces in 6 regions in Luzon, Visayas and Mindanao

# How to reach us . . .
